REFERENCE(S)

1. Strategic Branch has been asked to supply maps for a "war room" type briefing facility to be used in briefing [REDACTED]. Four map boards have been provided. Maps will be used to indicate location of current developments as well as to plot items of interest.
2. Since a listing of maps available in the map library is not available here, we can not order the desired maps by number, for this reason a description of what we have been requested to supply is provided below:
 - a. Map of the world showing national boundaries. Map board provided is 72 inches long and 48 inches high.
 - b. Map of Berlin showing sector boundaries. Details on street plans, street car lines, railroad lines and the subway are desired. Map board provided is 65 inches wide and 67 inches high.
 - c. Map of East Germany showing immediate approaches. Desire transportation net: rail, highway and water (canal and river). Also desire location and names of inhabited areas, cities, towns and villages. Map board provided is 72 inches wide and 67 inches high.
 - d. Map of Central Europe (Primary interest is in Poland, East Germany, Czechoslovakia and Hungary.) showing present boundaries and the Western boundary of the USSR. Desire, if possible, a map on which countries are shown in different colors. Map board provided is 65 inches wide and 67 inches high.
3. Your supplying us with the most recent map coverage available, on the four areas listed, will enable us to meet the requirements levied upon us. If there should be some delay in providing the most recent coverage because of reproduction or procurement problem, could you send something which could be used until the others are available. This would be helpful since we have been requested to supply the maps as soon as possible.
4. We have been asked for three copies of each of the four maps requested. Maps should be unclassified. Any additional maps, which you feel might be helpful in a project of this type, would be appreciated.
5. Can you supply us with a listing of maps available on the USSR and the European Satellites? The availability of such a listing in the Strategic Branch would greatly facilitate our work.
